

## Cyber security checklist for your LMS

<input type="checkbox"/>	Review your security policies and procedures on a regular basis
<input type="checkbox"/>	Provide ongoing training to your end-users
<input type="checkbox"/>	Adopt a strong password policy / use password manager
<input type="checkbox"/>	Implement encryption, Single Sign On and Multi-factor Authentication
<input type="checkbox"/>	Have different levels of access for various users
<input type="checkbox"/>	Host your sites in a secure well optimised cloud architecture
<input type="checkbox"/>	Stick to regular software updates
<input type="checkbox"/>	Work with a third party provider to relieve IT management and administrative burden, look for 24/7 monitoring and support
<input type="checkbox"/>	Have a plan of attack for when things go wrong / assess all possible risks and have a plan for each instance
<input type="checkbox"/>	Run regular phishing exercises to keep your end-users vigilant to cyber attacks
<input type="checkbox"/>	Encourage information sharing; communicate changes / attempted attacks to your team to keep them aware
<input type="checkbox"/>	Use a respected software provider and/or Partner whose values and procedures around security align with yours
